POSTCARD TO PARIS PROJECT

A group of Harrisonburg area residents have come together to draw attention to the Paris Talks on Climate Change. We are members of faith communities, environmental groups, and other concerned people who believe we all need to recognize the importance of this critical event. Our goal is to inform local citizens about the urgency of climate change and the need for global and local actions to address this huge challenge.

We also want to encourage the citizens of Paris as they continue to reel from the events of November 13.

Please sign our Postcard to Paris and let your voice be heard! And then join our effort. We plan to continue to work together to reduce energy consumption and to bring a just transition to 100% renewable energy so as to build a sustainable and resilient community.

We invite you to be part of this new grassroots movement.
