

# THE CLIMATE CHALLENGE

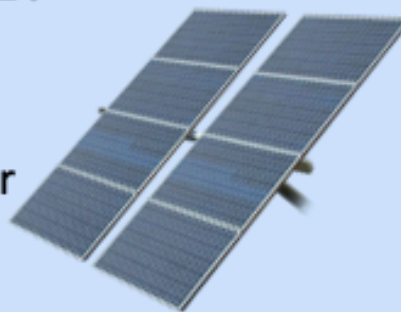

## WHERE ARE WE?

Crazy weather  
High cost  
Vulnerability:  
    Food, Water  
    Forced immigration  
National security  
Financial system threat\*

## WHERE DO WE NEED TO BE?

Carbon-neutral economy by 2050  
Carbon-free grid much sooner  
Transportation fuels will take longer  
Buildings; Agriculture; Water

## CAN WE GET THERE? YES!

The US is back.  
Business gets it.  
Bankers get it.

Automakers are going electric.  
Cities and state are stepping up.  
*Wind and Solar are the cheapest sources of electricity.*
